

Caio Rossi

FRONTEND DEVELOPER

A dedicated professional, utilizing skills in JavaScript and React to create projects that not only showcase technical expertise but also aim to integrate and connect people in innovative ways.

PROFESSIONAL EXPERIENCES

• **Freelance Web Developer**

(nov.2023-Currently)

Developed diverse projects, including a financial tracking system, digital catalogs, personal pages, and customized marketplaces for different clients. The projects were developed using HTML, CSS, Javascript, and React.

• **Private English Tutor**

(apr.2022-jun.2023)

Contributed to the learning of students aged 8 to 30, covering various levels of English proficiency.

• **Department of Culture and Tourism of Jaguarão**

(jun.2018-oct.2019)

Approved as an intern, I led the strategic planning and developed the first Municipal Tourism Plan, actively contributing to the promotion and enhancement of the sector in the region.

SOCIAL PROJECTS

- **CodeDevs** - Organized and guided a group of 52 individuals, divided into 6 teams, with each team working on a different project.
- **Insightify** - Developed an interactive online art experience, where independent artists can showcase their galleries.
- **WorkThrive** - Developed 5 digital portfolios for professionals from various fields seeking employment, providing personalized support to highlight their skills and achievements.

SKILLS

- **React.js**
- **JavaScript (ES6+)**
- **Html5**
- **CSS3**
- **Inglês C2 (EF Set)**
- **Espanhol C1 (Cervantes)**

EDUCATION

- Completed High School
- Bachelor of Science in Tourism Management (2017-2021)

ADDITIONAL COURSES

- CS50x - Harvard (2023-2024)
- CS50T - Harvard (2023)
- Javascript - IFSUL (2024)
- UI & UX - PUC (2023)
- Imersão Dev 7 e 8 - Alura (2023, 2024)

Rio Grande do Sul, Brazil

CODEDEVS

Led a project that brought together multiple developers with the goal of fostering teamwork skills, simulating the collaborative development experience. I organized, maintained communication with team members, assigned tasks, participated in meetings, guided, and assisted in the completion of the six projects assigned to the teams.

INSIGHTIFY

I have created a virtual gallery where various artworks can be viewed, along with explanations for each piece. The site includes audio descriptions for the artworks, aiming to accommodate individuals with visual impairments. The project was developed solely using JavaScript, without the use of frameworks

BOOKSTORE

The project arose from the need to streamline the sale of books from my bookshelf, utilizing programming to create a practical digital catalog. Developed in React.js, it extends beyond commercial needs, showcasing the creative integration of programming into everyday life

MODISH

An interactive fashion showcase project, crafted in HTML, CSS, and Javascript, stands out for its dynamic approach and minimalist design. Focused on constructing a visually appealing interface, the project excels in its interactivity and refined aesthetics

DIGITAL PORTFOLIO

My digital portfolio is an interactive showcase of my work, emphasizing a range of projects and my commitment to innovation. Designed to provide a minimalist experience, it offers in-depth details about my professional journey, highlighting my growth and including contact information and social media for easy and direct connection.
